

Rip-Proof Colours

Product Specification

Product Description and Applications

Rip proof is a woven Polyester fabric with a plasticized PVC coating on both sides, one side being exceptionally smooth. Rip-proof is exceptionally strong. The material has no memory which allows the finished tags to spring back when crushed, this enables secure bar code scanning when other plastic tags would fail. Rip proof is available in blue, grey, orange, green, red and yellow. Rip-Proof colours are pre printable up to 4 colours.

Applications that currently utilise Rip-Proof include:

Steel Production
Steel Stock Holding
Engineering

Construction
Aerospace
Mechanics

Printability

Variable information printing including barcodes is possible on one side using a wide range thermal transfer printers and special high temperature ribbons, Dura-ID are happy to advise on the best printer and ribbon solution.

Storage Guidelines

Dura-ID Solutions recommend keeping this product out of direct sunlight, in a dry place in temperatures between 18°C - 23°C and a RH of between 50%-65%. Prolonged storage in wide variation temperatures can affect the shelf-life of Polyolefin Tag.

Recyclability

Rip-Proof is not recyclable due it being made from PVC.

Thickness	µm - 550 +/- 20%
Material Weight	GSM - 640 +/- 5%
Service Temperature	-40°C - +200°C
Recommended Ribbon	Premium Ribbon

The above values and information are given in good faith but without warranty. Dura-ID recommends the testing of samples to ascertain suitability. It is the responsibility of the end user to satisfy the suitability of the product for the application. All goods are supplied in accordance with our standard conditions of sale.
